

LCAI Internal Marketing Team Call

Wednesday, September 30 | Suggested length: 30 minutes

Goal: Agree on priorities, responsibilities, and what we need for Thursday's Lunar kickoff.

1. **Set our immediate priorities — 7 minutes**

What are the three most important outcomes for the first month? Agree on where Lunar should focus first: messaging, website accuracy, public reputation, or developer awareness

2. **Confirm approvals and information flow — 7 minutes**

Who reviews content, verifies technical claims, and makes final decisions? Identify a backup reviewer and a path for questions that require DUNA or technical input.

3. **Align on the core story — 5 minutes**

Review "Lightchain AI: Verifiable Web3 Intelligence." Agree on a plain-language explanation, the live capabilities we can demonstrate, and claims that still need confirmation.

4. **Resolve Lunar's kickoff needs — 5 minutes**

Confirm available brand assets, public roadmap dates, live dashboards, and social-channel contacts. Assign owners to missing information.

5. **Prioritize website updates — 3 minutes**

Identify the most urgent content corrections, what can move forward now, and who will coordinate with the developer.

6. **Confirm owners and next steps — 3 minutes**

Assign deadlines, agree on a manageable check-in cadence, and capture unresolved questions for Thursday.

Leave with: Three agreed priorities, named owners, a clear approval process, and a short list of kickoff questions.
